

# Software Engineering

WEEK 01 LECTURE 01

- How shall you start development if I ask you to build a
  - Goal Management System ?
  - Exam Management System
  - LMS ?

## A STORY OF FIRST SOFTWARE DEVELOPMENT.

- Client: I want you to build the software for my company
- PM: what are your requirements.
- Client: here is the list.
- PM: start developing the requirements.
- Client: that what's I did not

# **GOLDEN CIRCLE**

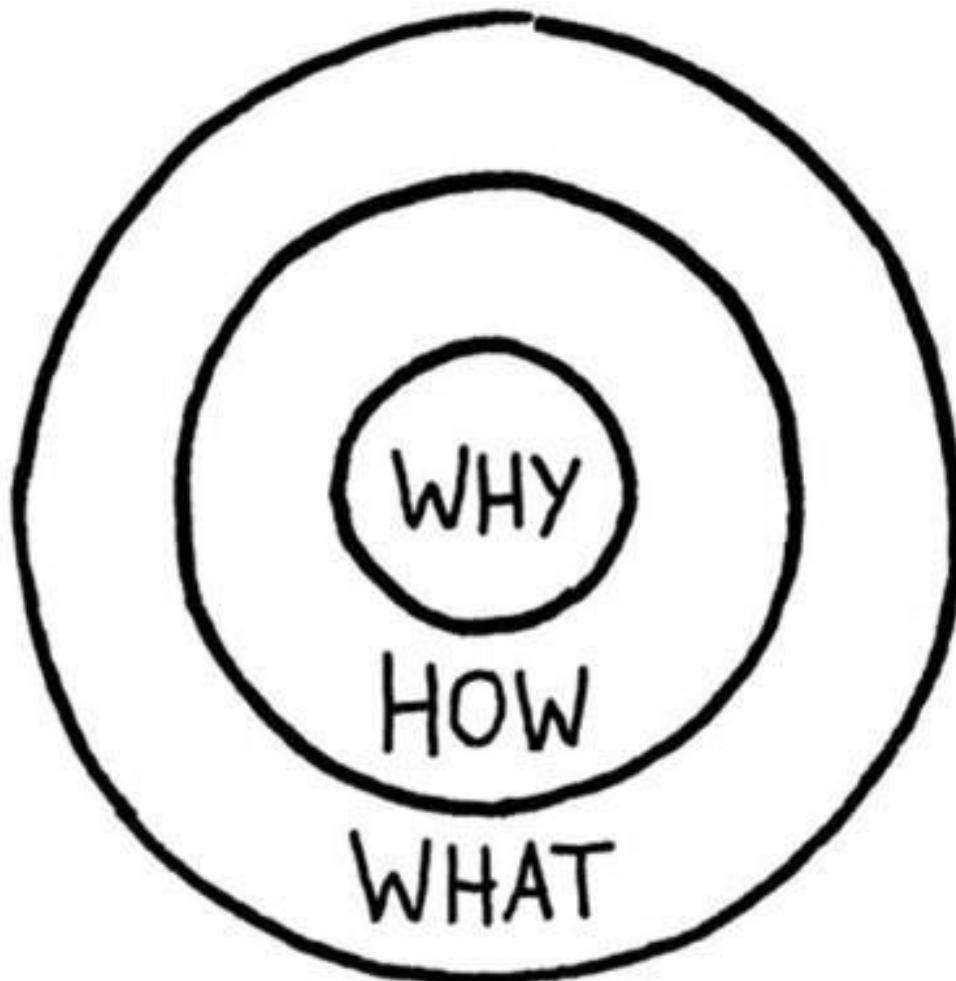

[HTTPS://WWW.YOUTUBE.COM/WATCH?V=L5TW0PGCYN](https://www.youtube.com/watch?v=L5Tw0PGcyn)

0 **SIMON SINEK**

- 
- You want to be successful in life start thinking every goal and task in terms of Golden Circle.

# GOLDEN CIRCLE

## **Why = The Purpose**

*What is your cause? What do you believe?*

Apple: We believe in challenging the status quo and doing this differently

## **How = The Process**

*Specific actions taken to realize the Why.*

Apple: Our products are beautifully designed and easy to use

## **What = The Result**

*What do you do? The result of Why. Proof.*

Apple: We make computers

■ After design, development and deployment of more than 100 applications/ softwares I have following Road Map

## CLIENT REQUIREMENTS

- Biggest Challenge what customer wants ?

## DEVELOPER UNDERSTANDING

■ How to communicate developer what customer wants

## WHAT IS BEST SOFTWARE DESIGN

- What is best way to write the code ?
- One Developer write everything in the main method other make classes.
- One make 2 classes and other make 10 classes.

## MANAGING SOFTWARE DEVELOPMENT

- Task Division and Running the project in parallel.
- How different developers work on same code file ?
- How to maintain history of the code and changes so bug can be tracked

## COMPLETING THE PROJECT ON TIME

- Work Division
- Communicating with Client
- Iterative vs waterfall

## VERIFICATION AND VALIDATION

- Test what we have developed is the requirement of the customers (have we developed right thing)
- Test what we have developed is working fine. (have we developed rightly).

## DEPLOYMENT

- Deploying the Project
- End user Training or onboarding

## SUMMARY

- Understanding the client.
- Writing Requirement So the developer can understand
- Software Design
- Software Development
- Software Testing
- Software Deployment

## BAD REQUIREMENT: HOW THE CUSTOMER EXPLAINS IT

How the customer explained it

## BAD UNDERSTANDING

How the Project Leader  
understood it

# BADE DESIGN: HOW DESIGNER DESIGN

IT

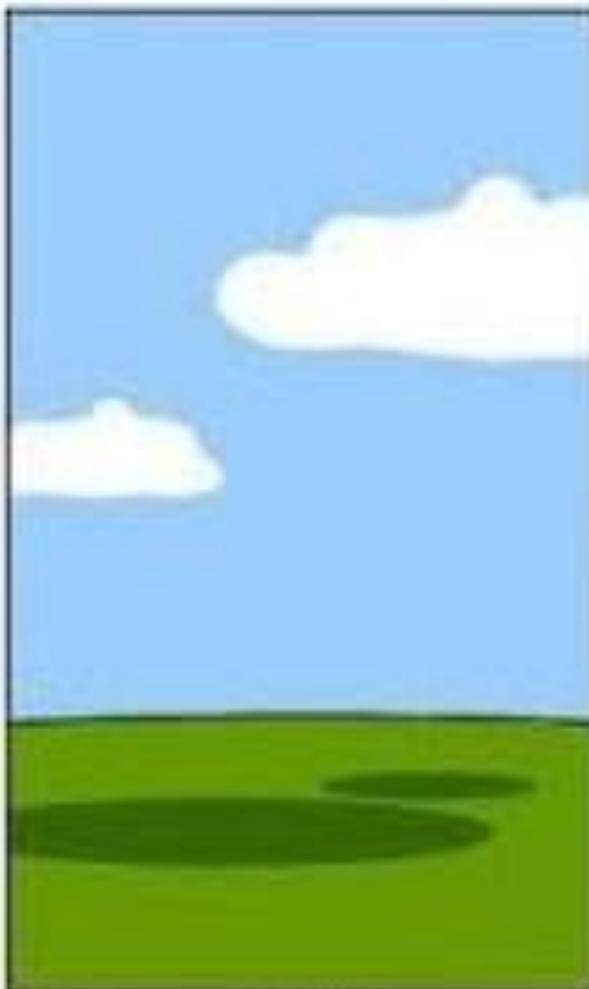

How the Analyst designed it

## BAD PROGRAMMING:WHAT PROGRAMMER DEVELOP

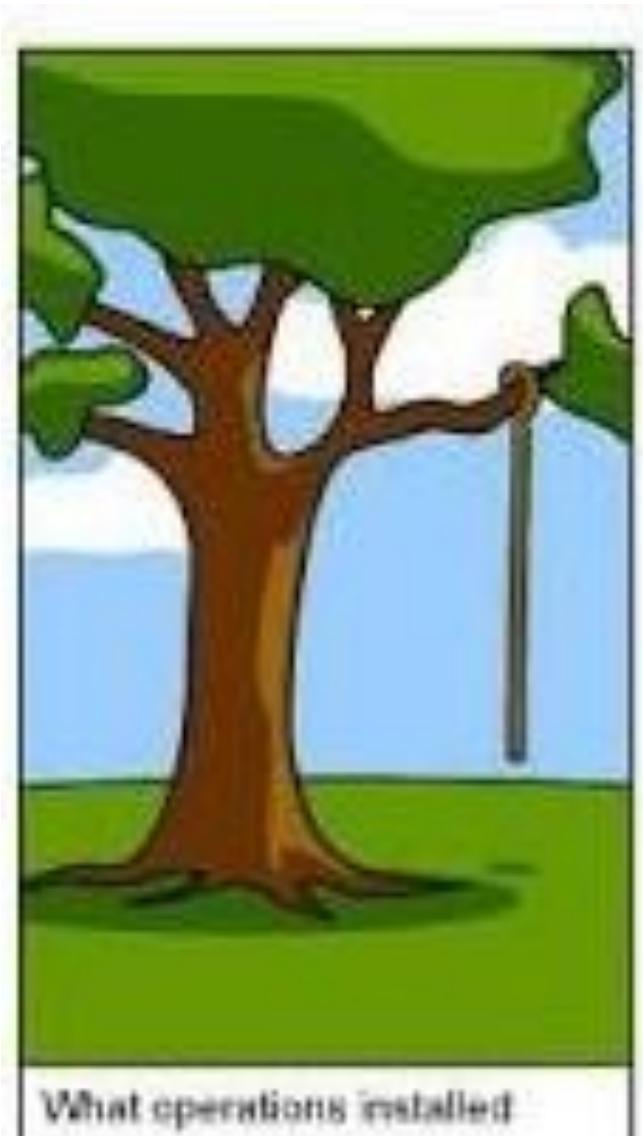

## BAD DOCUMENTATION:WHAT WAS DOCUMENTED

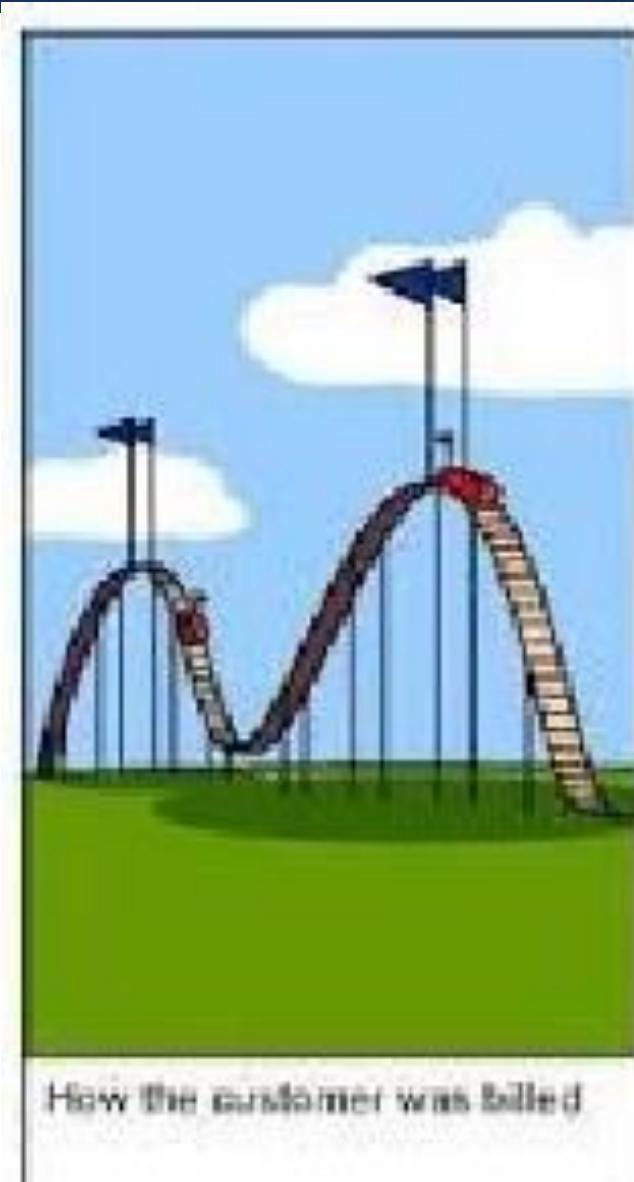

How the project was documented

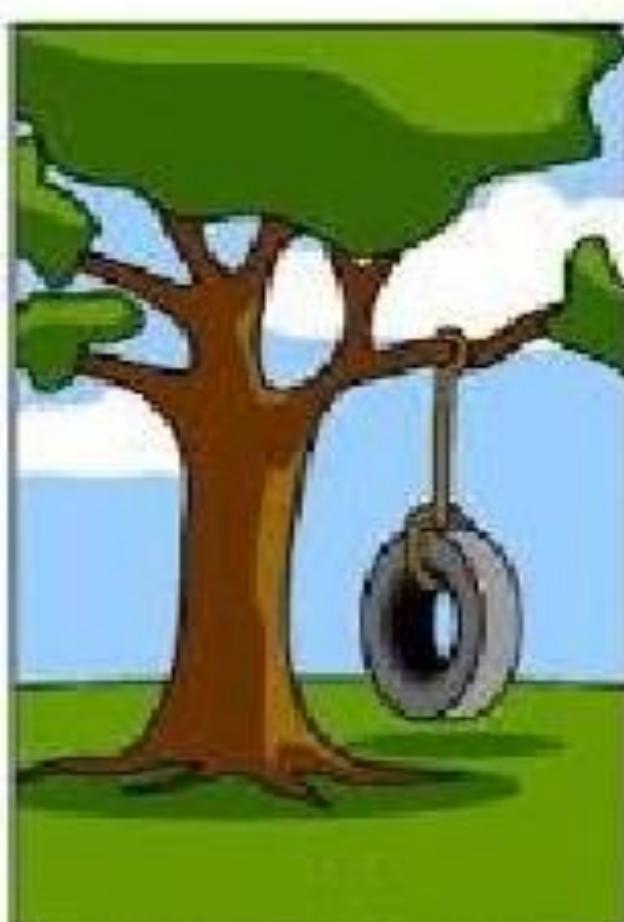

## BAD DEPLOYMENT:

## BAD VALUES:WHAT WAS BILLED

## **BAD REQUIREMENT:WHAT CUSTOMER REALLY NEEDED**

What the customer really

---

---

---

**WHAT SHALL YOU  
LEARN IN THIS  
CLASS**

## WHAT YOU LEARN IN THIS CLASS

- Understand your Client.
- Communicate with Developers
- Make a Better Software Design.
- Develop a Software according  
to  
the Designed.
- Works in Teams

# COURSE MAP

Understanding	Design	Planning	Development	Testing
<ul style="list-style-type: none"><li>• Requirement Writing</li><li>• Use Case Writing</li><li>• Wire framing</li><li>• Story Boarding</li><li>• Test Case Writing</li></ul>	<ul style="list-style-type: none"><li>• Static Design</li><li>• Dynamic Design</li><li>• Design Patterns</li><li>• Strong software design vs Weak software design</li><li>• Design Principles</li></ul>	<ul style="list-style-type: none"><li>• Project Planning</li><li>• Agile Methodology</li><li>• Sprint execution</li><li>• Team work</li></ul>	<ul style="list-style-type: none"><li>• Visual Programming</li><li>• Layer Architecture</li><li>• Implementation of Design Patterns</li><li>• Two Projects</li></ul>	<ul style="list-style-type: none"><li>• Writing test cases</li><li>• Testing the systems</li></ul>

## PROJECTS

- Select Project.
- Dream Software with Small functionality.
- You need to submit your project statement in next class.
